SKILLS

JavaScript, Angular 2+, RxJS, NodeJS, TypeScript, HTML, CSS, Redux, Web Components, Polymer, Socket IO, RESTful APIs, Express, MongoDB, GraphQL, Webpack, Git, Jenkins, TravisCI

EDUCATION

Bachelor of Technology in Computer Science, JNTU A 2014-2018

OPEN SOURCE

Some of the key contributions are

[Lock File Notifier](#) - VSCode

extension which notifies when node_modules is out of date with yarn.lock/package-lock.json file.

[Angular CLI](#) - contributed to schematics and build tooling.

[rxjs-deck](#) - MDX deck for RxJS with intuitive stream diagrams and examples.

[GoforEvent](#) - event booking platform with payment integration, QR code verification and booking for college fests.

[IntelliCam](#) - Android app which turns mobile into text scanner with 90% accuracy and creates PDF from images.

PROFILE

Front end developer with ~4 years of professional experience in building web applications. Has a strong knowledge in Angular and has experience building RESTful and GraphQL API design with NodeJS.

An active team player. Awarded "Delivery excellence" as an individual and as a Team at the organization level. Proficient in Data structures and Algorithms.

WORK EXPERIENCE

2018, July **Software Engineer**

Present

EPAM Systems

Working with a team of developers and taking care of the dev workflow setup. Integrated challenging SSO and OAuth2 protocols in Electron based product. Involved in architecture and UX design discussions. Actively participated in code reviews and refactoring. Developed an organization-wide dynamic custom Angular schematics for quick scaffolding projects which is used by multiple teams.

PROJECTS

Platform Administration

May 2020 - Present

Web application to control the access to the internal API's for the Users and user groups. Assign/Unassign of licenses, privilege's are handled. Technologies used: Angular, proprietary UI component library based on Polymer 3, Express

Sales Demo

June 2019 - Present

Web application to showcase the power of Refinitiv API's. This tool is used by the sales team to provide a demo. Has user friendly images, graphs as well as dev friendly swagger-like UI. Technologies used: Angular, proprietary UI component library based on Polymer 3, Web components, Express, MongoDB, Protractor

Visual Feedback

Nov 2018 - April 2019

Performance centric Electron based application. Technologies used: Typescript, Webpack, Express
